Reg No: 192421170

1. Question: Find the frequency of each character in the string "Hello World".

Answer:

H $\rightarrow$ 1

e $\rightarrow$ 1

l $\rightarrow$ 3

o $\rightarrow$ 2

W $\rightarrow$ 1

r $\rightarrow$ 1

d $\rightarrow$ 1

Note: Space $\rightarrow$ 1 if space is also counted.

2. Question: What are the operations performed in SLR parsing?

Answer:

The main operations in SLR parsing are:

1. Shift
2. Reduce
3. Accept
4. Error

Shift – Moves the input symbol onto the stack.

Reduce – Replaces symbols using a grammar production.

Accept – Indicates successful parsing.

Error – Indicates that the input string is invalid.

3. Question: What is the triple representation for the expression $a = b + c * d$?

Answer:

(0) * c d

$$(1) + b \ 0$$

$$(2) = 1 \ a$$

The expression is evaluated as:

$$c * d \rightarrow b + (c * d) \rightarrow a = \text{result}$$
